Datasheet "04900-7940R"

SAFE-O-TRONIC® ACCESS LS400 electronic RFID and PIN code lock

An electronic RFID and PIN code lock combines contactless unlocking via RFID chip with the entry of a numerical code. It offers flexible, secure access control and allows the use of one or both authentication methods.

SAFE-O-TRONIC® ACCESS LS400 electronic RFID and PIN code lock (MIFARE® Classic or MIFARE® DESFire) for keyless identification and use, can be operated with either RFID or PIN code, programmable for personalised or changing locker use, including master code function and RFID master key and manager function, wear-free capacitive keypad, robust metal housing, colour: black, for right-opening

+ Can be operated with either an RFID card or keyboard
+ Option for 2-factor authentication (RFID and PIN code)
+ Private and multi-user mode
+ Sturdy metal housing in White aluminum with black control panel
+ Easy battery replacement without dismantling the locking system
+ RFID standard: MIFARE® Classic / MIFARE® DESFire
+ Integrated clock with versatile time functions
+ Includes high-quality battery pack (3x AAA 1.5V)
+ Long battery life (approx. 20,000 locking cycles)
+ Visual and audible battery warning

„German Quality"
from the market leader

The color concept

With our new color concept, we are not only presenting current and attractive colors for every environment, but have also greatly simplified the color surcharge system. You won't need it very often anyway, because we now offer 144 colors and color combinations at no extra charge.

Locking systems

One for everything? That was once the case. Today's locking system solutions from C+P are as diverse as the applications for which they are designed. We would be happy to advise you on the options available for your specific project.

Accessories

Want to get the most out of your locker or steel cabinet for your practice? C + P offers a wide range of additional equipment.

Trust is good, but ...

control is better. At least when it comes to quality assurance. That is precisely why both our manufacturing processes and the C+P products themselves are subject to extremely demanding quality management, which is essentially based on two column bases: our in-house test laboratory on the one hand and, of course, regular external inspections and controls on the other.
