SAFE-O-MAT® twin-coin coin-operated deposit lock

Produktgruppe: Castle **series:** Evolo PLUS

A coin-operated deposit lock is a mechanical lock that is reserved by inserting a coin or token. It is often used for security compartments in specialist shops and shopping centres and releases the deposit at the end of use.

SAFE-O-MAT® twin-coin coin-operated deposit lock with 1 key, housing made of sturdy plastic with 2 coin slots for inserting either a 1 or 2 euro coin, cylinder suitable for damp locations with emergency opening function via optional PROMAX control key, colour: black, for right-opening

- + 2 coin slots (twin coin funtion) for inserting either a 1 or 2 euro coin
- + optionally usable for foreign currencies or two different currencies (e.g. in border areas)
- + PROMAX control function for 'visible' emergency openings via automatic cylinder removal
- + User key with special key head as break-off protection
- + Operating instructions on the inside of the lock can also be used as advertising space Installation and operating instructions

The color concept

With our new color concept, we are not only presenting current and attractive colors for every environment, but have also greatly simplified the color surcharge system. You won't need it very often anyway, because we now offer 144 colors and color combinations at no extra charge.

Locking systems

One for everything? That was once the case. Today's locking system solutions from C+P are as diverse as the applications for which they are designed. We would be happy to advise you on the options available for your specific project.

Accessories

Want to get the most out of your locker or steel cabinet for your practice? C + P offers a wide range of additional equipment.

Trust is good, but ...

control is better. At least when it comes to quality assurance. That is precisely why both our manufacturing processes and the C+P products themselves are subject to extremely demanding quality management, which is essentially based on two column bases: our in-house test laboratory on the one hand and, of course, regular external inspections and controls on the other.
