# Coin-operated deposit and token operated lock SAFE-O-MAT® twin-coin multi use

A coin-operated deposit lock is a mechanical lock that is reserved by inserting a coin or token. It is often used for security compartments in specialist shops and shopping centres and releases the deposit at the end of use.

SAFE-O-MAT® twin-coin multi-use coin-operated deposit/token-operated lock with 1 key, sturdy plastic housing with 2 coin slots for inserting a 2 euro deposit coin and a 1 euro collection coin, with integrated compact cassette for collection, Cylinder suitable for damp locations with emergency opening function via optional PROMAX control key, colour black, for right-opening

+ 2 coin slots (twin coin funtion) for inserting a 2 euro deposit coin and a 1 euro token
+ Automatic collection of the token and any number of intermediate openings possible
+ Return of the deposit coin when leaving the facility by pressing the return button
+ PROMAX control function for ‘visible’ emergency openings through automatic cylinder removal User key with special key head as break-in protection Operating instructions on the inside of the lock can also be used as advertising space

„German Quality"
from the market leader

## The color concept

With our new color concept, we are not only presenting current and attractive colors for every environment, but have also greatly simplified the color surcharge system. You won't need it very often anyway, because we now offer 144 colors and color combinations at no extra charge.

## Locking systems

One for everything? That was once the case. Today's locking system solutions from C+P are as diverse as the applications for which they are designed. We would be happy to advise you on the options available for your specific project.

## Accessories

Want to get the most out of your locker or steel cabinet for your practice? C + P offers a wide range of additional equipment.

## Trust is good, but ...

control is better. At least when it comes to quality assurance. That is precisely why both our manufacturing processes and the C+P products themselves are subject to extremely demanding quality management, which is essentially based on two column bases: our in-house test laboratory on the one hand and, of course, regular external inspections and controls on the other.
