

# BURG Flexo.RFID Retro-Fit electronic RFID lock

**Produktgruppe:** Castle

**series:** Evolo PLUS

An RFID lock is an electronic access system that is operated by contactless reading of an RFID chip or card. It offers a convenient and secure means of access control without a physical key and often has additional functions such as access rights, time control and logging.

BURG Flexo.RFID Retro-Fit electronic RFID lock (MIFARE® Classic 1K or MIFARE® DESFire EV) for keyless identification and use, programmable for changing (standard) or personalised locker use, including master and manager function, colour: black, for right-opening hinges

- + Multi-user (standard) and private mode
- + Easy mode change via optional mode change card
- + Easy battery replacement without dismantling the locking system
- + RFID standard: MIFARE® Classic 1K / MIFARE® DESFire EV
- + Multi-user mode with integrated occupied indicator for MIFARE® Classic 1K
- + Easy retrofitting, e.g. when replacing mechanical spindle locks
- + Up to 10 user cards can be programmed in private mode
- + Includes high-quality batteries (2x VARTA 1/2 AA H-R)
- + Long battery life (approx. 25,000 locking cycles)
- + Acoustic battery warning

## The color concept

With our new color concept, we are not only presenting current and attractive colors for every environment, but have also greatly simplified the color surcharge system. You won't need it very often anyway, because we now offer 144 colors and color combinations at no extra charge.

## Locking systems

One for everything? That was once the case. Today's locking system solutions from C+P are as diverse as the applications for which they are designed. We would be happy to advise you on the options available for your specific project.

## Accessories

Want to get the most out of your locker or steel cabinet for your practice? C + P offers a wide range of additional equipment.

## Trust is good, but ...

control is better. At least when it comes to quality assurance. That is precisely why both our manufacturing processes and the C+P products themselves are subject to extremely demanding quality management, which is essentially based on two column bases: our in-house test laboratory on the one hand and, of course, regular external inspections and controls on the other.

Many of our products are GS-tested by TÜV Thüringen. We will be happy to send you copies of the relevant certificates on request.
