Datasheet "08500-866SR"

EURO-LOCKS Nimbus 3963 electronic RFID and PIN code lock

An electronic RFID and PIN code lock combines contactless unlocking via RFID chip with the entry of a numerical code. It offers flexible, secure access control and allows the use of one or both authentication methods.

EURO-LOCKS Nimbus 3963 electronic RFID and PIN code lock (ISO14443A, Legic Advant and MIFARE®) for keyless identification and use, can be operated with either RFID or PIN code, programmable for personalised (standard) or changing cabinet use including master and manager function, robust metal housing, integrated emergency opening function via optional master key, colour: black, for right-opening

+ Can be operated either with an RFID card or a keypad
+ Private (standard) and multi-user mode
+ Mode change via PIN function
+ Housing made of sturdy die-cast zinc with black powder coating
+ RFID standard: MIFARE®
+ Multi-user mode with integrated occupied indicator for MIFARE® Classic 1K
+ Includes high-quality batteries (2x AAA 1.5V)
+ Long battery life (approx. 50,000 locking cycles)
+ Visual and audible battery warning
+ Option for mechanical emergency opening with master key

„German Quality"
from the market leader

The color concept

With our new color concept, we are not only presenting current and attractive colors for every environment, but have also greatly simplified the color surcharge system. You won't need it very often anyway, because we now offer 144 colors and color combinations at no extra charge.

Locking systems

One for everything? That was once the case. Today's locking system solutions from C+P are as diverse as the applications for which they are designed. We would be happy to advise you on the options available for your specific project.

Accessories

Want to get the most out of your locker or steel cabinet for your practice? C + P offers a wide range of additional equipment.

Trust is good, but ...

control is better. At least when it comes to quality assurance. That is precisely why both our manufacturing processes and the C+P products themselves are subject to extremely demanding quality management, which is essentially based on two column bases: our in-house test laboratory on the one hand and, of course, regular external inspections and controls on the other.
