

DIGILOCK Aspire electronic RFID lock, Evolu PLUS series

Manufacturer information

Produktgruppe: Castle

series: Evolo PLUS

An electronic RFID lock is a keyless access system that makes using cabinets and cases particularly convenient. Identification is carried out simply via an RFID medium, such as a card or transponder. Depending on the application, the lock can be programmed for rotating users or for fixed, personalised use. Additional functions such as battery warning, emergency opening and time-controlled access support easy day-to-day management.

DIGILOCK Aspire electronic RFID lock (MIFARE® Classic/Ultralight/DESFire EV1-3/Plus®S, LEGIC advant, ICLASS, SEOS, FeliCa) for keyless identification and access, programmable for rotating (standard) or personalised locker use, robust metal housing, motorised bolt drive, dust- and splash-proof to protection class IP55, integrated emergency opening function via manager key, brushed nickel finish made of plastic with black RFID reader

The color concept

With our new color concept, we are not only presenting current and attractive colors for every environment, but have also greatly simplified the color surcharge system. You won't need it very often anyway, because we now offer 144 colors and color combinations at no extra charge.

Locking systems

One for everything? That was once the case. Today's locking system solutions from C+P are as diverse as the applications for which they are designed. We would be happy to advise you on the options available for your specific project.

Accessories

Want to get the most out of your locker or steel cabinet for your practice? C + P offers a wide range of additional equipment.

Trust is good, but ...

control is better. At least when it comes to quality assurance. That is precisely why both our manufacturing processes and the C+P products themselves are subject to extremely demanding quality management, which is essentially based on two column bases: our in-house test laboratory on the one hand and, of course, regular external inspections and controls on the other.

Many of our products are GS-tested by TÜV Thüringen. We will be happy to send you copies of the relevant certificates on request.
