

BURG Flexo.Code Retro-Fit electronic PIN code lock

Produktgruppe: Castle

series: Evolo PLUS

An electronic PIN code lock is a keyless access system that is reserved by entering a PIN code via a keypad. It is usually powered by batteries. Such locks often offer additional functions such as user management or time control.

BURG Flexo.Code Retro-Fit electronic PIN code lock for keyless identification and use, programmable for changing (standard) or personalised locker use including master code function, high-quality keypad with tactile feedback, integrated real-time clock (RTC), colour black, for right-opening

- + Multi-user (standard) and private mode
- + Mode change via PIN function
- + Easy battery replacement without dismantling the locking system
- + Easy retrofitting, e.g. when replacing mechanical spindle locks
- + High-quality keypad with tactile feedback
- + High-quality batteries included (2x VARTA 1/2 AA H-R)
- + long battery life (approx. 30,000 locking cycles)
- + visual battery warning

The color concept

With our new color concept, we are not only presenting current and attractive colors for every environment, but have also greatly simplified the color surcharge system. You won't need it very often anyway, because we now offer 144 colors and color combinations at no extra charge.

Locking systems

One for everything? That was once the case. Today's locking system solutions from C+P are as diverse as the applications for which they are designed. We would be happy to advise you on the options available for your specific project.

Accessories

Want to get the most out of your locker or steel cabinet for your practice? C + P offers a wide range of additional equipment.

Trust is good, but ...

control is better. At least when it comes to quality assurance. That is precisely why both our manufacturing processes and the C+P products themselves are subject to extremely demanding quality management, which is essentially based on two column bases: our in-house test laboratory on the one hand and, of course, regular external inspections and controls on the other.

Many of our products are GS-tested by TÜV Thüringen. We will be happy to send you copies of the relevant certificates on request.
